

Uljas
DISTILLERY & BREWERY

uljasdb.fi

Experience the power of the nature in Uljas Dry Gin from the Peltö-Uljas estate in southern Finland. In this gin fresh juniper berries and the vigorous seabuckthorn meet select herbs and spices.

Dry, soft, spicy and luscious with seabuckthorn, Uljas Dry Gin's flavour is perfect on its own and for mixed drinks and cocktails.

Uljas Dry Gin is a drink made in a copper pot still with renewable energy and respect to tradition.

This gin is a promise of harmony between craft and environment. It's a flavour experience in each sip.

Uljas Dry Gin is available in an ecological recycled plastic bottle and in a premium glass bottle with a gift box.
