

PERFECTION AS A PASSION

Uljas Distillery & Brewery Oy is a distillery and microbrewery founded in 2022 at the Pelto-Uljas farm in Monninkylä Finland. The farm's roots go back to the 17th century.

The source of passion for establishing Uljas Distillery & Brewery is whiskey and beer made from the grain of its own field.

The grain is processed with pride and love while respecting tradition, aiming to continue the farm's history as a distillery and brewery for the next 400 years.

HISTORY

Uljas Distillery & Brewery's passion is to continue in the footsteps of the ancestors, refining the crops of the Pelto-Uljas fields into a spirit for the end users.

The farm's history stretches back to 1603, and the current host, distillery and brewmaster Ilkka Uljas is the 17th owner of the farm. In the past, at the old Pelto-Uljas farm, bread was baked from flour ground from the grain and transported to Helsinki by horse.

The crops are organically farmed and the area has natural pasture land, taking care of the Ratia Ranch highland cattle in the summer.
